

Object

IAuthenticator

AppModelUserManager

```
graph BT; AppModelUserManager --> Object; AppModelUserManager --> IAuthenticator;
```

The diagram illustrates a class hierarchy where `AppModelUserManager` inherits from both `Object` and `IAuthenticator`. A horizontal line connects the two parent classes, with a vertical line descending from its center to the `AppModelUserManager` box. Two arrows point from the bottom of the `AppModelUserManager` box to the bottom of the `Object` and `IAuthenticator` boxes, indicating inheritance.
